

PRODUCT DATA SHEET

EC-98361 Digital Soil EC Tester

Professional measurement of soil EC. suitable for household farmland, garden, indoor, outdoor

Large-screen LCD display clear and quick measurement data. Automatic temperature compensation, accurate data

widely used in greenhouse planting, gardening planting, farmland planting, laboratory, agriculture, pot planting, etc.

- Soil EC detector, widely used in hydroponics and agricultural planting fields.
- Equipped with LCD backlight display, convenient for various environmental readings.
- Determine the index of soil water-soluble salt to determine whether the salt ions in the soil restrict the growth of crops.
- Soil conductivity tester, withstand rust and corrosion, suitable for all kinds of soil.

Feature:

- Product model: EC-98361
- Product name: Soil EC Tester
- EC Range: 0-1999us/cm, 0-10.00mS/cm
- Accuracy $\pm 3\%$ F.S.
- Calibration 1413 uS/Cm One Point
- Automatic temperature compensation:
- backlight display
